CIPM™ Certified International Project Manager Charter Certification®

AAPM® CIPM® Event Overview

By Attending This Program You Will Be Able To:

- Formalize the process of project delivery within your organization
- Examine the project delivery cycles
- Discover tools and techniques that aid in managing the results of various categories of project structures
- Learn how to develop effective strategies to manage projects

The Added Benefits You Will Receive Include:

- The ability to use the designation CIPM™ on your business card and resume
- Up to 18 months membership to the AAPM professional body
- Access to the AAPM project management network and body of information online
- Access to the AAPM international journal published online

- The CIPM™ shows that you have completed graduate level project management education and you have substantial experience in managing projects on a regional and global level

About The Certified International Project Manager Event

Project management is the world's fastest growing profession and in today's ever-changing business environment, organizations demand multi-skilled individuals who can manage far more than their predecessors. During this intensive course you will examine the delivery cycles that are routinely encountered in business today, discover tools and techniques that aid in managing the results of various categories of project structures and learn how to develop effective strategies to manage these projects. On satisfactory completion of this program you will receive the award of Board Certification from the American Academy of Project Management (AAPM), which is recognized in over 150 countries. You will then be able to use the designation CIPM™ on your business cards and resume.

Who Should Attend? Certified International Project Manager

This highly practical qualification has been specifically designed for senior level project management professionals including:

1. Organizational Project Managers
2. Team Leaders
3. Senior Analysts
4. Executive Directors

5. • Operations Directors
6. • Program Managers
7. • Research and Development Officers
8. • Research Scientists
9. • Management Consultants and other Contractors

10. Plus anyone who is involved in project management, or anticipates being involved in projects in the future. This program is designed specifically to suit a broad range of professionals, as the program deals with technical project methodologies with a large emphasis on people and soft skills.

The CIPM® Training Style

This program is delivered using “blended learning”. This involves classroom lecturing, highly intensive case study/role playing reviews, classroom interaction and feedback, and one-on-one coaching from the facilitator.

CIPM™ Program Overview

Project Management is growing exponentially. It's now used in virtually all industries, such as: government, healthcare, telecom, IT, education and banking. Effective project management is how these organizations streamline to improve productivity. As businesses are restructured, project managers

take over many responsibilities. Expertise in project management is a source of security, prosperity and power to many companies.

Professional Development Program Outline

HRPM Course Overview & Benefits

As more human resource professionals are invited to participate at the executive level, project management skills and processes become critical tools in meeting the organization's strategic talent and management objectives. Through training and implementation of project management principals and processes, the organization can reap the benefits of clear communications; an understanding of performance expectations; vertical alignment of human resources (people) to drive strategic goals and objectives; and improve overall productivity.

Human Resource projects often involve all aspects of an organization and it's distinct functional departments. Successful project management involves complex collaboration with

disparate although related internal operations. Successful project managers, and human resource professionals who work with them, must call forth skills in leadership, organization, planning, and understanding of the essential aspects of project management. This course is designed to broaden your understanding of project management principles, raise awareness of skills and knowledge needed to successfully execute project plans and manage change initiatives, as well as build understanding of potential risks and pitfalls that often befall project implementation. Finally, the training of basic project management skills and concepts will increase efficiency in your department, develop your staff and provide an additional level of credibility within the organization.

HRPM Course Objectives

1. Define, explain and apply the five project management process groups: Initiation, Planning, Execution, Performance, and Close.
2. Define and explain processes used to determine project feasibility and project cost/benefit analysis to come to a

- decision on project viability and potential return on investment.
3. Identify parameters of the Initiation process to develop the business case, including the executive summary, problem definition, project overview, strategic alignment, cost/benefit analysis, alternatives analysis and approvals.
 4. Outline and define areas of project Planning including scope, deliverables, timeline, costs/budget, quality, resources needed, stakeholder assessment, risk and
 5. contingency plans, and procuring products and services from outside the project team.
 6. Define the types of deliverables needed in the Planning process for the project team and organization including but not limited to: Organization charts (team/company), responsibility matrix, timeline/schedule, risk management log, communications plans.
 7. Understand the elements of developing a Work Breakdown Structure when defining and assigning project tasks.
 8. Understand and apply various change-management models.
 9. Recognize and identify the specific items needed to develop a project schedule including dependencies of tasks.
 10. Understand what types of skills sets and capabilities are needed for project teams in the definition of levels of authority, task assignment and responsibilities.
 11. Understand and outline personal and organizational values to reduce the risk of ethical dilemmas.
 12. Define stakeholder groups and the level and frequency of stakeholder and sponsor participation in a project.
 13. Understand the most common project pitfalls and how to mitigate them to ensure project success.
 14. Determine stakeholder groups who will be affected by new process implementation to define success and delivery methods for change.
 15. Understand and define the leadership qualities needed to manage, monitor and direct project teams, establish

- accountably, level of authority, problem solving and motivate performance.
16. Understand change management concepts and areas of resistance to guide the project team and stakeholders through the Monitoring and Controlling process toward implementation.
 17. Outline and discuss the goals of the Execution, Monitoring and Controlling processes of project management.
 18. Outline the frequency, method of communication, and information needed to communicate project milestones and progress to the stakeholders.
 19. Use the One-Page Project Manager™ (OPPM™) as a key project communication tool.
 20. Understand key skills needed in leading project teams, facilitation of meetings, and presentation of project scope, goals and objectives.
 21. Discuss best practices of teambuilding concepts and people management structures as they apply to cross-functional project teams.
 22. Understand the steps involved in assessment, prioritizing and mitigating project risks.
 23. Understand and evaluate the steps in the post-implementation review and evaluation of project outcomes during the project Closing process, including obtaining feedback from stakeholders, project team members and sponsors for learning transfer.
 24. Understand the importance of documentation of lessons learned or best practices, and the value of a project Closing celebration.

- Status as a Fellow of the American Academy of Financial Management (FAAPM) and two-year membership in the professional association
- Certificate of Completion by from an Registered Program and advanced placement into secondary certification programs.
- A thorough grounding in Advanced Business Strategy principles, metrics and tools

- Familiarity with strategies and case studies that show leadership techniques for today's toughest industries and sectors
- Knowledge of how to prepare and execute a Strategic Business Plan

Program Design

In this five module Senior Executive Development Program - which represents a Mini MBA and Management Consultant Certification - you will be taught by one of the Academy's certified Experts

This curriculum has been developed by a group of MBA lecturers, legal and finance professionals, senior executives and the American Academy of Project Management (AAPM) and will show you how to get the most out of your career development. It will demonstrate how to effectively manage change in your organization and develop skills to ensure you rise to or stay at the top of your profession.

The first 2 modules of this intensive program examines Finance for Non Financial Managers, and you will learn techniques for understanding the triggers and mechanisms for profitability within your business as well as learning the strategy and tactics of today's leading CFO's and financial professionals. In the following two modules, you will study the art of Change Management, Cost Control and IT Management for Non-Technical executives. Finally, you will learn the components and

mechanisms for core business development and strategic planning including Marketing Strategy, Leadership and Strategic and Change Management. You will learn to drive business results and measure the performance of your business units and team.

This intensive and wholly practical training program has never been available before for US delegates to take in this region. It is widely acclaimed and fully certified.

All course fees include certification from the Academy.

International Executive Professional Development Program

Module 1

Finance For Non-Financial Executives (Master Financial Professional)

Get a crash course in MBA Finance techniques, designed especially for Non-Finance executives. This course will focus on the basic finance survival course within a global enterprise. Designed by CFOs and leading Finance Professors, this course covers the basics of the financial reporting and operational aspects of a listed company.

1. Analysis of financial statements

2. Shareholder wealth maximization
3. Applied corporate finance
4. Strategic management and the financial planning process
5. Introduction to the “Stock Exchange”
6. Cash flow – the lifeblood of business

Module 2

Cost Control And Effective Financial Management

The Manager's role in operational cost control and financial administration, is perhaps the most critical and visible of all requirements in an organization. All executives have the issues of budget and operational spend but many also have the task of controlling cost behavior and cost allocation. A company can live and die by its ability to control, use and manipulate cash flow and this can be the life-blood of a manager's ability to achieve sustainable profitability.

7. The changing business environment
8. Cost control and cost management
9. Budgeting

10. The Balanced Scorecard and performance management
11. Effecting change for cost efficiency

Module 3

A glimpse into the world of International Business Strategy. This is not a high-level theoretical course component. This is a journey into the reality of conducting business on the global stage. As the business boundaries continue to dissolve globally with the impact of localization, the Internet and greater market accessibility, the future of your capability as an executive will rely heavily on your ability to understand and collaborate with International clients, partners and suppliers.

International Business Strategy

12. Economics of localization
13. Understanding cultural differences and their influence on the enterprise
14. Market entry, political reality and competitive structures
15. Alliances – structure and management
16. Organization, operations and structural control Issues
17. Global strategies

Module 4

Recently a Harvard MBA Professor said that IT and “Technology is not a competitive advantage, it is a fact of business life”. So why gain a basic understanding of current leading IT technologies, such as the Internet and XML, and their impact on your business? For the same reason you need to know how to use the telephone. You can’t do business without it.

IT Management For Non-Technical Executives

18. Using information technology for competitive advantage

19. Understanding the Internet's power to alter channel strategies

20. Gaining a broader understanding of IT in the context of the company,

industry and world

21. Building IT-based information age companies

22. Emerging technologies and trends

Module 5

Marketing is a mechanism for developing and growing your business, but if done incorrectly can be an expensive and

misunderstood component of your operations. This course component on Marketing Strategy will give executives an understanding of core marketing requirements within business and the ability to measure marketing efficiency.

Marketing Strategy And ROMI

23. Developing fast to-market technology for competitive advantage

24. Exploring the economics of customer loyalty and total customer satisfaction

25. Putting a customer-focused, service profit chain to work

26. Formulating an action-oriented marketing plan

27. Return on Marketing Investment (ROM)

Module 6

Leadership – it is the single quality that all very successful individuals have. It is what you need to lead an organization to success. Strategic Leadership and Change Management introduce techniques for developing strong leadership skills and an organization that follows.

Leadership And Change Management

AGCC Agile Communications Certification - Project Management Communications

By attending this practical and informative course, you will:

- *Refine your communication competence*
- *Grasp the essential elements of Agile Project Management*
- *Be trained, tested and certified in Agile Communication and receive the ability to use the AgCC designation*
- *Better prepare for your PMI Agile Certification*
- *Receive intuitive, easy-to-implement Agile Project Management tools*
- *Appreciate the benefits of simple communication for effective Agile Project Management*
- *Use the One-Page Project Manager™ (OPPM™) as a key project communication tool*
- *Successfully determine the level of Agile principles and practices essential to your unique projects*
- *Develop a comprehensive tool kit for successful Agile Projects that you can use immediately*

AgCC COURSE OVERVIEW

As project managers, your ability to communicate and manage change are key elements for on-time, on-budget projects which mitigate risks, magnify quality and deliver scope that exceeds expectations. After four days, you will not only grasp the necessary components of Agile Project Management, but will augment this understanding with seriously simple tools and templates. The authors and creators of the tools that are now easing burdens and delivering successful results all over the world will teach the course.

AgCC DAY 1

The necessity and power of simplicity for Agile Project Management and Communication will include these modules:

- *Simplicity — Why and How Much*
- *Project Management Simplified*
- *Agile Simplified*
- *The Agile Manifesto*
 - *4 values*
 - *12 principles*

- Job #1 — Communication*

— *Two exhaustive studies of thousands of project managers reveal what the*

best of the best do differently

— *Why Agile is even more dependent on communication than traditional project*

management methods.

- The risk continuum between Agile and Traditional*

- Agile methods compared to Waterfall processes*

AgCC DAY 2

The elegance and essence of Agile methodology will include the following roles, tools, meetings, and metrics:

- Scrum Teams*

- Product Owners*

- Scrum Master*

- Product Backlog*

- Sprint Backlog*

- Burndown Chart*

- Release Backlog*

- Spring Planning*

- Daily Scrum*

- Sprint Review*

- Sprint Retrospective*

- User Stories*

- Story Points*

- Business Value*

- Team Capacity*

- Velocity*

AgCC DAY 3

The One-Page Project Manager™

- *Simplicity and Why OPPM™*

- *The Power and Pitfalls of Simplicity*

- *Simplicity this side, and the other side of complexity*

- *Simplexity, by Jeffrey Kluger*

- *The Visual Display of Quantitative Information, by Edward Tufte*

- *Ockham's razor – the law of succinctness*

- *The Five Essential Parts of Every Project*

- *Objectives — the what and why*

- *Owners — the who*

- *Tasks — the how*

- *Timeline — the when*

- *Budget — the how much*

- *OPPM™ Building Steps 1 through 12*

- *OPPM™ Reporting Steps 1 through 5*

- *Customizing OPPM™ and the PMO*

- *OPPM™ for IT Projects*

AgCC DAY 4

The proven practical application of Agile/OPPM™ will include:

- *The Agile/OPPM™ Template*

- *MyOPPM-online*

- *Negotiation for Agile Project Managers*

- *The Agile/OPPM™ for IT and Non-IT projects*

- *The Agile/OPPM™ for Managing Consultants*

- *Strategy Execution with Agile/OPPM™*

- *Communication Best Practices*

AAPM American Academy of Project Management ®

**CEC Certified e-Commerce
Consultant**
Or
PME Project Manager E-Business

CEC - Since 1998

The Worlds' First E-Business Graduate Credential – with a focus on MBA Skills

AAPM ® CEC © Certification - Certified E-Commerce Consultant ™

CEC ® Certified eCommerce Consultant - Charter Certification - CEC – Certified E-Commerce Consultant ™

A Certification Listed and Featured in the New York Times for over a Decade. All holders of this credential must have a solid knowledge of e-Business and CEC Body of Knowledge as constructed ICECC Institute <http://icecc.com/handbook.html>

By Attending This Program

Attendees of this program will learn about cutting edge issues related to: e-business, eMarketing, eManagement, Entrepreneurship, e-Legal, e-Ethics, e-Finance, e-Security, eLeadership, and Professionalism.

Who Should Attend?

This highly practical qualification has been specifically designed for senior level project management professionals including:

- Organizational e-Business Managers
- Team Leaders

- IT Professionals
- Executive Directors
- Operations Directors
- Program Managers
- Research and Development Officers
- Management Consultants and other Contractors

Plus anyone who is involved in e-business or IT project management, or anticipates being involved in e-projects in the future. This program is designed specifically to suit a broad range of professionals, as the program deals with technical project methodologies with a large emphasis on people and soft skills.

The CEC Training Style

This program is delivered using “blended learning”. This involves classroom lecturing, highly intensive case study/role playing reviews, classroom interaction and feedback, and one-on-one coaching from the facilitator.

Topics for the Course Include:

1.CEC - INTRODUCTION TO ELECTRONIC COMMERCE

- Foundation of electronic commerce
- Definitions and content of the field
- Benefits and limitations
- The driving forces of electronic commerce
- Impact of e-commerce: everything will be changed

2.CEC - E BUSINESS TECHNOLOGIES

- Retailing in electronic commerce
- Direct marketing
- Online customer service
- Electronic intermediaries
- Reactive electronic department stores
- Internet and extranet
- Architecture of the internet, intranet, and extranet
- Internet software
- Applications of intranets

- Intranet application case study
- Considerations in intranet development
- Extranet products and services
- Applications of extranets
- Business models of extranet applications

3.CEC - E-MARKETING

- Internet consumers and market research
- Building customer relationship
- The consumer behavioral model
- Personal characteristics and the demographics of the internet surfers
- Consumer purchasing decision making
- One-to-one and relationship marketing
- Delivering customer service in cyberspace
- Market research for e-commerce
- Intelligent agents for consumers

- Organizational buyer behavior
- Advertising in electronic commerce (methods and strategies)
- Economics and effectiveness of advertisement
- Online catalogs

4. CEC - E-COMMERCE MANAGEMENT

- Procurement revolution at general electric
- Characteristics of B2B e-commerce
- Procurement management using the buyer's internal marketplace
- Supplier-oriented marketplace: Cisco online case
- From traditional to internet-based EDI
- Integration with back-end information systems
- The role of software agents for B2B e-commerce
- Solutions of B2B e-commerce

5. CEC - STRATEGIC MANAGEMENT FOR ELECTRONIC COMMERCE

- Strategic planning for E-Commerce
- Strategy formulation
- Critical success factors for E-Commerce
- Return on investment and risk analysis
- Electronic commerce strategy in action
- The steps to successful E-commerce programs
- Competitive intelligence on the internet
- Implementation: plans and execution
- Managerial issues

6. CEC - LEGAL AND ETHICAL ISSUES IN ELECTRONIC COMMERCE

- E-commerce legal incidents: Contractual issues in Ecommerce
- Copyright infringement on the web
- Legal, Ethical, and other public policy issues
- Protecting privacy
- Protecting intellectual property

- Internet laws on speech, internet indecency, public protection, and censorship
- Other legal issues (domain name registration, proposals and bids, licenses, financial services, the use of cookies, and international protection)

Case studies and work group session: Develop a marketing launch plan

CPRM Certified Project Risk Manager

AAPM's mission is to serve its global membership and stakeholders as a world leader in educating and reinforcing the international knowledge of executives and potential leadership of institutions. AAPM™ now has representative offices in the US WTC N.O. Offices, Hong Kong, Beijing, India, Moscow, Istanbul, Dubai, Athens, Guyana, Puerto Rico, Bahamas, Kuwait, Latin America and South America, Singapore, The Caribbean, Europe, and now the Philippines. AAPM™ mandates consent to high standards of professional conduct, and AAPM activities are International in nature and scope.

AAPM-CPRM® Certification Courses for Project Risk Management

By Attending You Can Learn to

- Deliver successful projects through better risk management
- Identify, analyze, respond to, monitor and control, and communicate project risks
- Effectively quantify and qualify risk impact (what a risk 'costs?') ensuring cost/benefit of responses
- Determine justifiable, defensible values, for cost and schedule contingency
- Develop and implement a Risk Management Plan
- Implement opportunity management to fully benefit from the 'upside risk'

Overview/Description

Private and public sector projects are uncertain. Not everything that we want to happen always happens. If we don't integrate risk management into our project and business management systems and processes, then projects are fragile and often hit with unexpected 'surprises' or 'bad luck' with nowhere to go but late and over budget.

Effective project risk and opportunity management enables a proactive approach where you can radically improve the chances of a successful project outcome by:

- Identifying and assessing risks upfront to ensure the project is within your 'risk tolerance'
- Proactively working to minimize risks and maximize opportunities – with a view to cost-benefit
- Deal with risks effectively should they happen

Our instructor combines excellent teaching with world class project risk and opportunity management experience. His certifications, academic qualifications are world recognized, as a registered training provider for PMI, this course complies with the latest version of the Project Management Treatise of Knowledge (*AAPM Guide*)

Course Objectives

By completing the PMI-RMP™ and AAPM-CPRM® Risk Management Certification Course,

candidates will understand how to:

Understanding Risk Management

- Definitions of risk, opportunity, uncertainty, issues, etc.
- Macro risk vs Micro risk, types of risk, and risk vs opportunity
- Organizational risk tolerance.

- Governance, TARA system, balancing risk control.
- Risk robust culture.
- Brief review of project risk planning and process.

Risk Management Planning

- Plan approach to risk management.
- Determine stakeholders and risk tolerance
- Understand roles and responsibilities
 - o Risk owner, project manager, team member, executive
- Develop risk and opportunity management plan
- Developing risk definition scales to consistently rate risks

Risk Identification

- **Top-down vs Bottom-up identification, classify risk**
- **Tools for risk identification**
 - o Document review, brainstorming, flowcharting, Ishikawa Diagram, lessons learned,

action, research, interviews, and assumptions.

• Human factors in identification

• How to state a risk for proper analysis: 3 key factors

Qualitative Risk Analysis

- Determining true risk impact; what does the risk 'cost'?
- Pre and post mitigation risk characteristics
 - o Role of mitigation and fallback plans, risk window, interactions/dependency
- Determining probability and impact
 - o Human factors in assessing risk characteristics

Quantitative Risk Analysis

- Assess confidence levels in achieving project objectives
- Working with ranges of outcomes: EMV, 3 point estimates
- Running and using the results of Monte Carlo simulation
- Sensitivity analysis, decision trees, utility

Risk Response Planning

- Mitigation strategies: identification and selection
- Cost-benefit of risk mitigation/opportunity promotion
- Mitigation plans, in-depth review of risk register content

Risk Monitoring and Control

- Risk occurrences; risk triggers and initiating fallback plans
- Monitoring mitigation and fallback plan status
- Re-evaluating existing risks and identifying new ones

The Project Management executive training program is designed for professionals seeking Risk Management (RM) certification or for other business professionals seeking to improve their professional repertoire with knowledge of project/business management.

CPRM® Certified Project Risk Manager is the credential for a specialist role in project risk management. This is a 4 day program inclusive of CPRM Examination. It recognizes your unique expertise and competency in assessing and identifying project risks, mitigating threats and capitalizing on opportunities, while still possessing a baseline knowledge and practical application in all areas of project management.

- Provide a consistent methodology for performing project risk management activities following Project Management Body of Knowledge (PMBOK).
- Provide techniques and tools for project risk management.
- Identify data requirements for risk analysis input and for output.
- Provide information on how project risk management fits into the overall project management process.
- Provide guidance on how to proactively respond to risks.

By attending course, you will be able to understand the importance of projects and legal scope issues in the contemporary organization. Learn the critical impact of the problem (project) definition phase on project success. Explore the three major areas of project development from a risk management perspective. Understand the role of project stakeholders in all aspects of the project. Discover how to embed the principles of risk management within the project management process and how to develop your own set of tools and techniques for optimizing project performance.

THE AMERICAN ACADEMY OF PROJECT MANAGEMENT

AAPM® - Project management is the world's fastest growing profession and in today's ever-changing business environment, organizations demand multi-skilled individuals who can manage far more than their predecessors. During this intensive course you will examine the delivery cycles that are routinely encountered in business today, discover tools and techniques that aid in managing the results of various categories of project structures and learn how to develop effective strategies to manage these projects. On satisfactory completion of this program you will receive the award of Board Certification from the American Academy of Project Management (AAPM), which is recognized in over 150 countries. You will then be able to use the designation CIPM™ on your business cards and resume.
